Sweet Plantain

Sliced Ripe

Tajada de Platano Maduro

Our ripe plantain slices are the result of a meticulous process that starts with the selection of high-quality plantains, ripened under controlled conditions to ensure their natural sweetness. They are then cross-cut into uniform slices, preserving their soft texture, authentic flavor, and characteristic golden color. This product is a delicious, convenient, and versatile option, ideal for direct consumption or use in the prepared food industry. Our standardized processing ensures consistency in every batch, meeting the highest standards of safety and quality.

Round Plantain

Precooked Ripe

Tronquitos de Platano Maduro

Our product is made of precooked, individually quick frozen (IQF) ripe plantain slices, carefully selected and processed through controlled industrial steps including cleaning, cooking, freezing, and safe packaging. Made from premium-quality plantains sourced in Colombia, the product retains its tender texture, natural sweetness, and signature golden color.

These slices are ready to heat and serve, making them an ideal side dish for various meals. They are suitable for preparation using deep fryers, ovens, microwaves, or air fryers. The product remains frozen at -18 °C, with a 12-month shelf life. It is packed in polyethylene bags within corrugated boxes, optimized for export in refrigerated containers.

This product meets international standards for microbiological safety, chemical content, and sensory quality, offering a versatile, nutritious, and widely accepted option in global food markets.

Whole PLantain

Precooked Sweet

Platano Maduro Entero

The IQF precooked sweet whole plantain is a natural product made from carefully selected plantains grown in Colombia. The production process includes raw material reception, cleaning, peeling, cooking, individually quick freezing (IQF), and packaging under strict safety and quality controls.

This product retains the natural organoleptic qualities of ripe plantains—intense yellow color, sweet flavor, and soft texture—making it an ideal side dish or complement in culinary preparations. The individually portioned format ensures convenience and efficiency for institutional kitchens, retail, and food service industries.

Stored at -18 °C, it has a 12-month shelf life and is packed in export-ready standardized packaging. It complies with international microbiological and chemical standards, ensuring food safety and consistent quality in every batch.

Platano Maduro Entero

Our green plantain toston is a 100% natural product made from carefully selected plantains grown in Colombia. It undergoes a rigorous industrial process that includes peeling, cooking, molding or natural explosion, cooling, individual quick freezing (IQF), and packaging—ensuring food safety, product quality, and sensory preservation. The toston maintains its tender texture, characteristic green plantain flavor, and golden color after cooking. It requires no thawing and is ideal for deep frying or air frying, offering a convenient and healthy side dish or snack.

Packed in export-ready formats, the product has a 12-month shelf life and meets strict international microbiological and chemical standards. IQF tostones are in high demand across food service, retail, and institutional kitchens thanks to their consistency, flavor, and ease of use.

Market Reach

INTERNATIONAL MARKET ACCESS

Our products meet global standards and adapt to diverse culinary cultures and regulatory frameworks.

EXPORT-READY INFRASTRUCTURE

Logistical capabilities, cold chain compliance, and scalable production tailored to international demands.

The global market for plantain-based products has experienced steady growth, driven by increasing demand for natural, convenient, and ethnic foods across food service and retail channels. Products such as IQF precooked ripe plantain slices and green tostones have gained solid market penetration in regions with significant Latin American and Caribbean influence, including:

- United States and Canada: Leading importers of IQF plantain products, with strong distribution in Hispanic retail chains, ethnic stores, and institutional food service providers.
- Western Europe (Spain, UK, Germany): Growing due to Latin and African diaspora and the rising popularity of global cuisine within HORECA channels.
- Middle East and Asia: Emerging niche markets where ready-to-eat exotic products are gaining traction, especially in the healthy food and fusion cuisine segments.
- Latin America and the Caribbean: Stable demand from supermarkets, institutions, and all-inclusive resorts that require standardized, ready-to-use products.

Key differentiators include: extended shelf life, preparation convenience, nutritional value, and authentic flavor. These factors give IQF plantain products a competitive edge over fresh, fried, or canned alternatives.

The global frozen side dish and snack market is projected to grow at a 6% CAGR from 2024 to 2029, offering strategic opportunities for Latin American exporters with certified production, traceability, and export-ready logistics.
